

Abbey Primary School

Forest School Progression Document

Forest School is an inspirational, non outcome based process that uses holistic learning methods to give all children the opportunity to take supported risks, foster resilience, build confidence, nurture independence and explore their creativity through problem solving whilst gaining hands-on experiences with the natural world.

Abbey Primary School will provide a quality Forest School experience by following these six principles:

1. Forest school is a long term process; weekly sessions during term time will ensure it remains frequent and regular.
2. Forest school must take place outside; we will utilise our on site field and outdoor classroom area.
3. Multiple areas of learning will be explored including but not limited to intellectual, emotional, social, physical, creative and spiritual.
4. We will help the children to take supportive risks suitable to their environment and themselves. We will not however push them beyond their own capabilities and potentially put them in danger.
5. Forest school is a child-led learner centred process and we will do our best to follow what the children are interested in. This may mean us disregarding part or whole lesson plans if they are not interested in the activities.
6. There will be a qualified Forest School practitioner leading the sessions at all times and continuing professional development is very much encouraged to enhance the experience for the learners.

Area of Knowledge	EYFS	Year 1/2	Year 3/4	Year 5/6
Environment	Forest School Rules Understanding the Boundaries where they can and can not go	Identifying hazards through the use of hazard triangles Use of directional language and simple compass	Introduction to and filling out Risk Assessments Introduction to map reading using steps to measure	Writing their own risk assessments of spaces and independently working to make the area safer.
